

## COMPANY PROFILE

Family owned and operated DoubleStar Corp. is a leading producer of high-quality, American made pistols, rifles, parts and accessories. What began as J&T Munitions, founded by Army veteran Jack Starnes and his late wife Teresa in 1977, morphed into J&T Distributing as the couple began selling AR-15 parts from their home in Winchester, Kentucky.

By offering premium parts at competitive prices, business quickly grew for J&T. So much so that in 1999 the company broke ground on its first facility, a 10,000 square foot warehouse. DoubleStar Corp., the FFL side of J&T Distributing, was formed in 2001 after repeated requests from customers for complete firearms made with the same high quality components that J&T offered.

Today DoubleStar/J&T Distributing continues to expand. In addition to thousands of AR-15 parts and accessories in stock, DoubleStar is also a custom build manufacturer with top of the line systems, a dedicated customer service department and a machine shop full of lathes, mills and CNC machines. This allows for the production of thousands of parts in-house. DoubleStar, now in a 64,000 square foot facility, is ready for anything the firearms industry can throw at it.

While the company may have grown exponentially and even generationally, as Jack and Teresa's son Jesse (Vice President) and daughter-in-law Stacy (CFO) play critical roles in the business, the core belief still adheres to Jack and Teresa's original vision of family values, great customer service and high quality, American-made products. The same principles that made DoubleStar what it is today will continue to propel the company into the future.

From all of us at DoubleStar/J&T Distributing, we appreciate your time and look forward to working with you.
